

Energy Management Policy

Being one of the largest modern facade manufacturers in the Baltic region Skonto Plan is an energy intensive company. We are aware of the importance of continuous improvement of energy efficiency as well as optimizing energy consumption costs. The company continuously invests in modern technologies to maintain responsible environmental and Energy Management Policy.

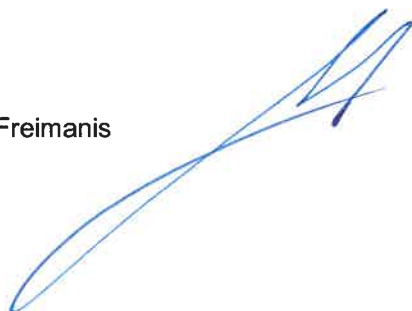

We commit ourselves to:

- Designate and implement goals for optimizing energy consumption in our operational activities.
- Keep up to date, plan and improve the energy management system.
- Efficiently use our internal and external resources and information to achieve the set goals.
- Strictly adhere to the regulatory enactments, as well as other requirements regarding the use, efficiency and consumption of energy resources.
- Take into account the energy efficiency factor when performing development, reconstruction or refurbishment of premises, equipment, systems or processes.
- To promote energy efficiency as an important aspect of decision-making in procurement processes.
- Encourage employees to observe energy efficiency improvement activities both at work and outside.
- Analyse and continuously improve the energy efficiency performance of Skonto Plan Ltd.

All associates and employees are informed about The Energy Management Policy. It is publicly available in the company's website www.skontoplan.com

This Policy will be kept up to date, particularly as the business changes in nature and size.
